According to an IBM Institute for Business Value study, more than three-quarters of enterprises today are using cloud computing to expand into new industries.

74% have adopted cloud to improve customer experience; and 71% use cloud to create enhanced products and services—while simultaneously downsizing legacy systems and reducing costs.

To remain competitive, businesses need to be able to respond quickly to marketplace changes, use analytics to understand customer experience, and apply that understanding to adapt their products and services based on what they learn.

Product lifecycles have shortened, and barriers to entry have become lower.

Today's enablers for growth, agility, and innovation include: Cognitively-enabled workflows,

Applied exponential technologies such as AI, Automation, IoT, and Blockchain,

Applications that span new and legacy solutions, and
